2023 Mathematical Contest in Modeling (MCM)®
Press Release—May 5, 2023

COMAP is pleased to announce the results of the 39th annual Mathematical Contest in Modeling (MCM). This year, 11,296 teams representing institutions from twenty-one countries/regions participated in the contest. Twenty-Two teams from the following institutions were designated as OUTSTANDING WINNERS:

Beijing Institute of Technology, China (2 Teams)
(SIAM Award 2303950) (Ben Fusaro Award 2309229)
Columbia University, NY, USA (2 Teams)
(INFORMS Award & MAA Award 2322645) (MAA Award 2322687)
Duke University, NC, USA
(COMAP Scholarship Award, MAA Award & SIAM Award)
East China Normal University, China (SIAM Award)
Fudan University, China
Nanjing University of Posts & Telecommunications, China
Northeastern University of China, China
(COMAP Scholarship Award & ASA Award)
Renmin University of China, China (2 Teams)
Shanghai Jiao Tong University, China (INFORMS Award)
Shanghai University of Finance and Economics, China
The Chinese University of Hong Kong, Shenzhen, China
Tiangong University, China (Frank Giordano Award)
Tianjin University, China
Tsinghua University, China (INFORMS Award)
University of Electronic Science and Technology of China, China
(2 Teams) (AMS Award 2300336)
Xi'an Jiaotong University, China
Xidian University, China
Zhejiang University of Finance and Economics, China (AMS Award)

Nanjing University of Posts and Telecommunications, China
(Finalist - AMS Award)

This year's contest ran over a single weekend from Thursday, February 16 to Monday, February 20, 2023. During that time, teams of three students researched, modeled, and wrote a solution to an open-ended real world modeling problem. The 2023 MCM was an online contest, where teams registered and obtained contest materials through COMAP's MCM Website.

The 2023 MCM problems represented a variety of challenging problems spanning the familiar to new. Each problem required teams to apply unique mathematical modeling skills to answer the questions posed. All three problems were created by the MCM Problem Committee, a unique blend of academicians and industry professionals with many years of mathematical modeling experience. Teams again had to be at the top of their game to excel.

The focus of Problem A was to examine the role of species diversity in an environment of irregular drought cycles. Some recent research indicates that plant communities may benefit when the community includes a greater diversity in the number and kinds of plants that are present. In times of more frequent drought conditions having a larger number of plant species may benefit the whole community. The teams who selected the A Problem were asked to develop a model to see if mathematical models might verify these observations. The teams were asked to develop a mathematical model to approximate the dynamics of a plant community, and the model should account for varying numbers of species in the community, varying levels of water scarcity, the impact of pollutants in the system, and habitat reduction. The teams were asked to determine the impact associated with different numbers of plant species and determine if there is an optimal level of species diversity for a given plant community.

For the B Problem, teams needed to provide recommendations to the Kenyan Tourism and Wildlife Committee to manage resources within and outside the current boundaries of the Maasai Mara game preserve. These recommendations needed to include specific policies and management strategies that would protect wildlife and other natural resources while also balancing the interests of the people who live in the area within the different areas of the preserve. In addition, the team's recommended policies and strategies should also mitigate the impacts of lost opportunities experienced by the people who live near the preserve and minimize negative interactions between animals and the people attracted to the preserve. Teams also needed to provide predictions about the long-term trends resulting from their recommendations.

For the C problem, teams were provided data on participation and success mined from Twitter users who played WORDLE, a popular game currently sponsored by the New York Times. Teams were asked to develop models to predict the number of scores for a given day reported on Twitter with a prediction (not confidence) interval. They were also asked to develop models to predict the probability distribution of scores based on the attributes of the word for the day and discuss the uncertainties of their result. From their attribute analysis, they were asked to classify words by level of difficulty, and to identify any interesting features of the data set.

A selection from the Outstanding solution papers will be featured in *The UMAP Journal,* along with commentaries from the problem authors and judges. All 11,296 of the competing teams are to be congratulated for their excellent work and enthusiasm for mathematical modeling and interdisciplinary problem solving.

2023 MCM Statistics

- **11296 Teams Participated**
- **2557 Problem A (23%)**
- **728 Problem B (6%)**
- **8011 Problem C (71%)**
- **22 Outstanding Winners (<1%)**
- **272 Finalist Winners (2%)**
- **758 Meritorious Winners (7%)**
- **2523 Honorable Mentions (22%)**
- **7234 Successful Participants (64%)**
- **42 Unsuccessful Participants (<1%)**
- **436 Disqualified (4%)**
- **9 Not Judged (<1%)**

To obtain additional information about the MCM and to obtain a complete listing of all team designations, please visit the MCM Website at: www.mcmcontest.com, or contact COMAP at: mcm@comap.com.

Major funding for the MCM is provided by COMAP. Additional support is provided by the Institute for Operations Research and the Management Sciences (INFORMS), The Society for Industrial and Applied Mathematics (SIAM), The Mathematical Association of America (MAA), The American Statistical Association (ASA) and The American Mathematical Society (AMS). COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that they are the only international contests in which students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, and workers.
