2023 Interdisciplinary Contest in Modeling (ICM)®
Press Release—May 5, 2023

COMAP is pleased to announce the results of the 25th annual Interdisciplinary Contest in Modeling (ICM). This year 9,563 teams representing institutions from thirteen countries/regions participated in the contest. Fifteen teams were designated as OUTSTANDING representing the following schools:

Beijing Institute of Technology, China
(INFORMS Award & COMAP Scholarship Award)
Chang'an University, China (Rachel Carson Award)
China University of Geosciences Beijing, China
(INFORMS Award)
China University of Petroleum, China (INFORMS Award)
Liaoning University, China
Nanjing University of Posts & Telecommunications, China
Renmin University of China, China (Vilfredo Pareto Award)
Shanghai Jiao Tong University, China (AMS Award)
Soochow University, China (SIAM Award)
Southwest Jiaotong University, China
Sun Yat-Sen University, China
Tianjin University, China
(SIAM Award & COMAP Scholarship Award)
University of Electronic Science and Technology of China, China
(Leonhard Euler Award)
Wuhan University, China (AMS Award)
Xidian University, China (AMS Award)

Pacific Lutheran University, Tacoma, WA, USA
(Finalist - MAA Award)
Seattle Pacific University, Seattle, WA, USA
(Finalist - MAA Award)
National University of Defense Technology, China
(Finalist - SIAM Award)

This year's contest ran over a single weekend Thursday, February 16 to Monday, February 20, 2023. During that time, teams of three students researched, modeled, and wrote a solution to an open-ended interdisciplinary modeling problem. The 2023 ICM was an online contest, where teams registered and obtained contest materials through COMAP's ICM Website.

ICM teams chose one of the following three problems: The D problem required teams to create a network of relationships between the UN Sustainability goals. The network is used to create priorities of the UN, and to understand the effects of technological advancements, natural disasters, and international crisis. The E problem required teams to develop a light pollution risk level metric for a location, apply it to several locations, and create intervention strategies to help lower the risk for specific locations. The F Problem required teams to find an existing Green GDP model and develop a metric to see the true impact on climate mitigation if this was the new global economic measure of country health. The teams analyzed one country to determine specific impacts if a change is made for Green GDP on that country. For all three problems, the student teams produced creative and relevant solutions to these complex questions and built models to handle the tasks assigned in the problems. The problems also required data analysis, creative modeling, and scientific methodology, along with effective writing and visualization to communicate their team's results in a 25-page report.

A selection of the Outstanding summaries will be featured in *The UMAP Journal*, along with commentaries from the problem authors and judges. This year's judges remarked that due to the multi-disciplinary nature of the problems, teams solved these problems using a variety of methods and tools. This allowed teams to showcase their strengths in many diverse areas including climate science, data science, dynamical systems, economics, environmental science, network science, policy, statistics, and sustainability.

2023 ICM Statistics

- **9563 Teams Participated**
- **1057 Problem D (11%)**
- **5780 Problem E (60%)**
- **2726 Problem F (29%)**
- **15 Outstanding Winners (<1%)**
- **277 Finalist Winners (3%)**
- **595 Meritorious Winners (6%)**
- **2011 Honorable Mentions (21%)**
- **5964 Successful Participants (62%)**
- **136 Unsuccessful Participants (1%)**
- **550 Disqualified Teams (6%)**
- **15 Not Judged (<1%)**

ICM is associated with COMAP's Mathematical Contest in Modeling (MCM), which was held during the same weekend. ICM is designed to develop interdisciplinary problem-solving skills in science, technology, engineering, mathematics (STEM) and the humanities, as well as competence in data science and written communication. Over the years the ICM problem topics have included environmental science, biology, chemistry, political science, operations research, information science, public health, sports analytics, network science and sustainability. Each team is encouraged to include team members from a range of disciplinary and interdisciplinary interests in applied problem solving and modeling. To obtain additional information and a listing of all the team designations, please visit the ICM Website at: www.mcmcontest.com.

Major start-up funding for the ICM was provided by a grant from the National Science Foundation (through Project INTERMATH) and COMAP. Additional support is provided by the Institute for Operations Research and the Management Sciences (INFORMS), The Society for Industrial and Applied Mathematics (SIAM), The Mathematical Association of America (MAA) and The American Mathematical Society (AMS). COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, workers, and community leaders.
