# 2024 Interdisciplinary Contest in Modeling (ICM)®
# Press Release—May 3, 2024

COMAP is pleased to announce the results of the 26th annual Interdisciplinary Contest in Modeling (ICM). This year 10,388 teams representing institutions from thirteen countries/regions participated in the contest. Eighteen teams earned OUTSTANDING designations or won an award as a FINALIST, their institutions are:

**East China Normal University, China (INFORMS Award)**
**Harvey Mudd College, CA, USA**
**(COMAP Scholarship Award & MAA Award)**
**Hunan Normal University, China (AMS Award)**
**Jiangsu Normal University, China**
**National University of Defense Technology, China (AMS Award)**
**Renmin University of China, China (3 Teams)**
**(COMAP Scholarship Award & SIAM Award 2409949)**
**Shanghai Jiao Tong University, China (Vilfredo Pareto Award)**
**Shenzhen University, China (SIAM Award)**
**Soochow University, China (INFORMS Award)**
**Tsinghua University, China (Leonhard Euler Award)**
**Xi'an University of Posts and Telecommunications, China**
**(INFORMS Award)**
**Xi'an Jiaotong University, China (AMS Award)**
**Zhejiang Sci-Tech University, China (Rachel Carson Award)**

**Brandeis University, MA, USA (Finalist - MAA Award)**
**Columbia University, NY, USA (Finalist - MAA Award)**
**Ningbo University, China (Finalist - SIAM Award)**

This year's contest ran over a single weekend Thursday, February 1 to Monday, February 5, 2024. During that time, teams of three students researched, modeled, and wrote a solution to an open-ended interdisciplinary modeling problem. The 2024 ICM was an online contest, where teams registered and obtained contest materials through COMAP's ICM Website.

ICM teams chose one of the following three problems: The D problem required teams to develop a dynamic model of the water levels in the Great Lakes. After determining the optimal water levels for the system, teams established algorithms that could be used by the two existing water-level control mechanisms to maintain optimal levels within the system. The E problem required teams to reconcile the needs of the property insurance industry with the needs of communities located in areas that are experiencing a rising number of extreme weather events. The teams developed models from both points of view and used the insights gained from the results of applying each to a historical landmark to make recommendations to community leaders regarding the landmark's future. The F problem required teams to develop a 5-year plan to make a notable reduction in illegal wildlife trade. Teams identified a client and an appropriate project given the powers, resources, and interests of the chosen client organization. Teams modeled the potential impact of their plan and identified additional powers and resources their chosen client would require for the project to be as successful as possible. For all three problems, the student teams produced creative and relevant solutions to these complex questions and built models to handle the tasks assigned in the problems. The problems also required data analysis, creative modeling, and scientific methodology, along with effective writing and visualization to communicate their team's results in a 25-page report.

A selection of the Outstanding summaries will be featured in *The UMAP Journal*, along with commentaries from the problem authors and judges. This year's judges remarked that due to the multi-disciplinary nature of the problems, teams solved these problems using a variety of methods and tools. This allowed teams to showcase their strengths in many diverse areas including climate science, data science, dynamical systems, economics, environmental science, network science, policy, statistics, and sustainability.

---

**2024 ICM Statistics**

- **10388 Teams Participated**
- **1971 Problem D (19%)**
- **5436 Problem E (52%)**
- **2981 Problem F (29%)**
- **15 Outstanding Winners (<1%)**
- **196 Finalist Winners (2%)**
- **751 Meritorious Winners (7%)**
- **2380 Honorable Mentions (23%)**
- **6059 Successful Participants (58%)**
- **79 Unsuccessful Participants (<1%)**
- **895 Disqualified Teams (9%)**
- **13 Not Judged (<1%)**

---

ICM is associated with COMAP's Mathematical Contest in Modeling (MCM), which was held during the same weekend. ICM is designed to develop interdisciplinary problem-solving skills in science, technology, engineering, mathematics (STEM) and the humanities, as well as competence in data science and written communication. Over the years the ICM problem topics have included environmental science, biology, chemistry, political science, operations research, information science, public health, sports analytics, network science and sustainability. Each team is encouraged to include team members from a range of disciplinary and interdisciplinary interests in applied problem solving and modeling. To obtain additional information and a listing of all the team designations, please visit the ICM Website at: www.mcmcontest.org.

*Major start-up funding for the ICM was provided by a grant from the National Science Foundation (through Project INTERMATH) and COMAP. Additional support is provided by the Institute for Operations Research and the Management Sciences (INFORMS), The Society for Industrial and Applied Mathematics (SIAM), The Mathematical Association of America (MAA) and The American Mathematical Society (AMS). COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, workers, and community leaders.*
